NATURAL DIVISIONS OF THE HIMALAYAN MOUNTAINS

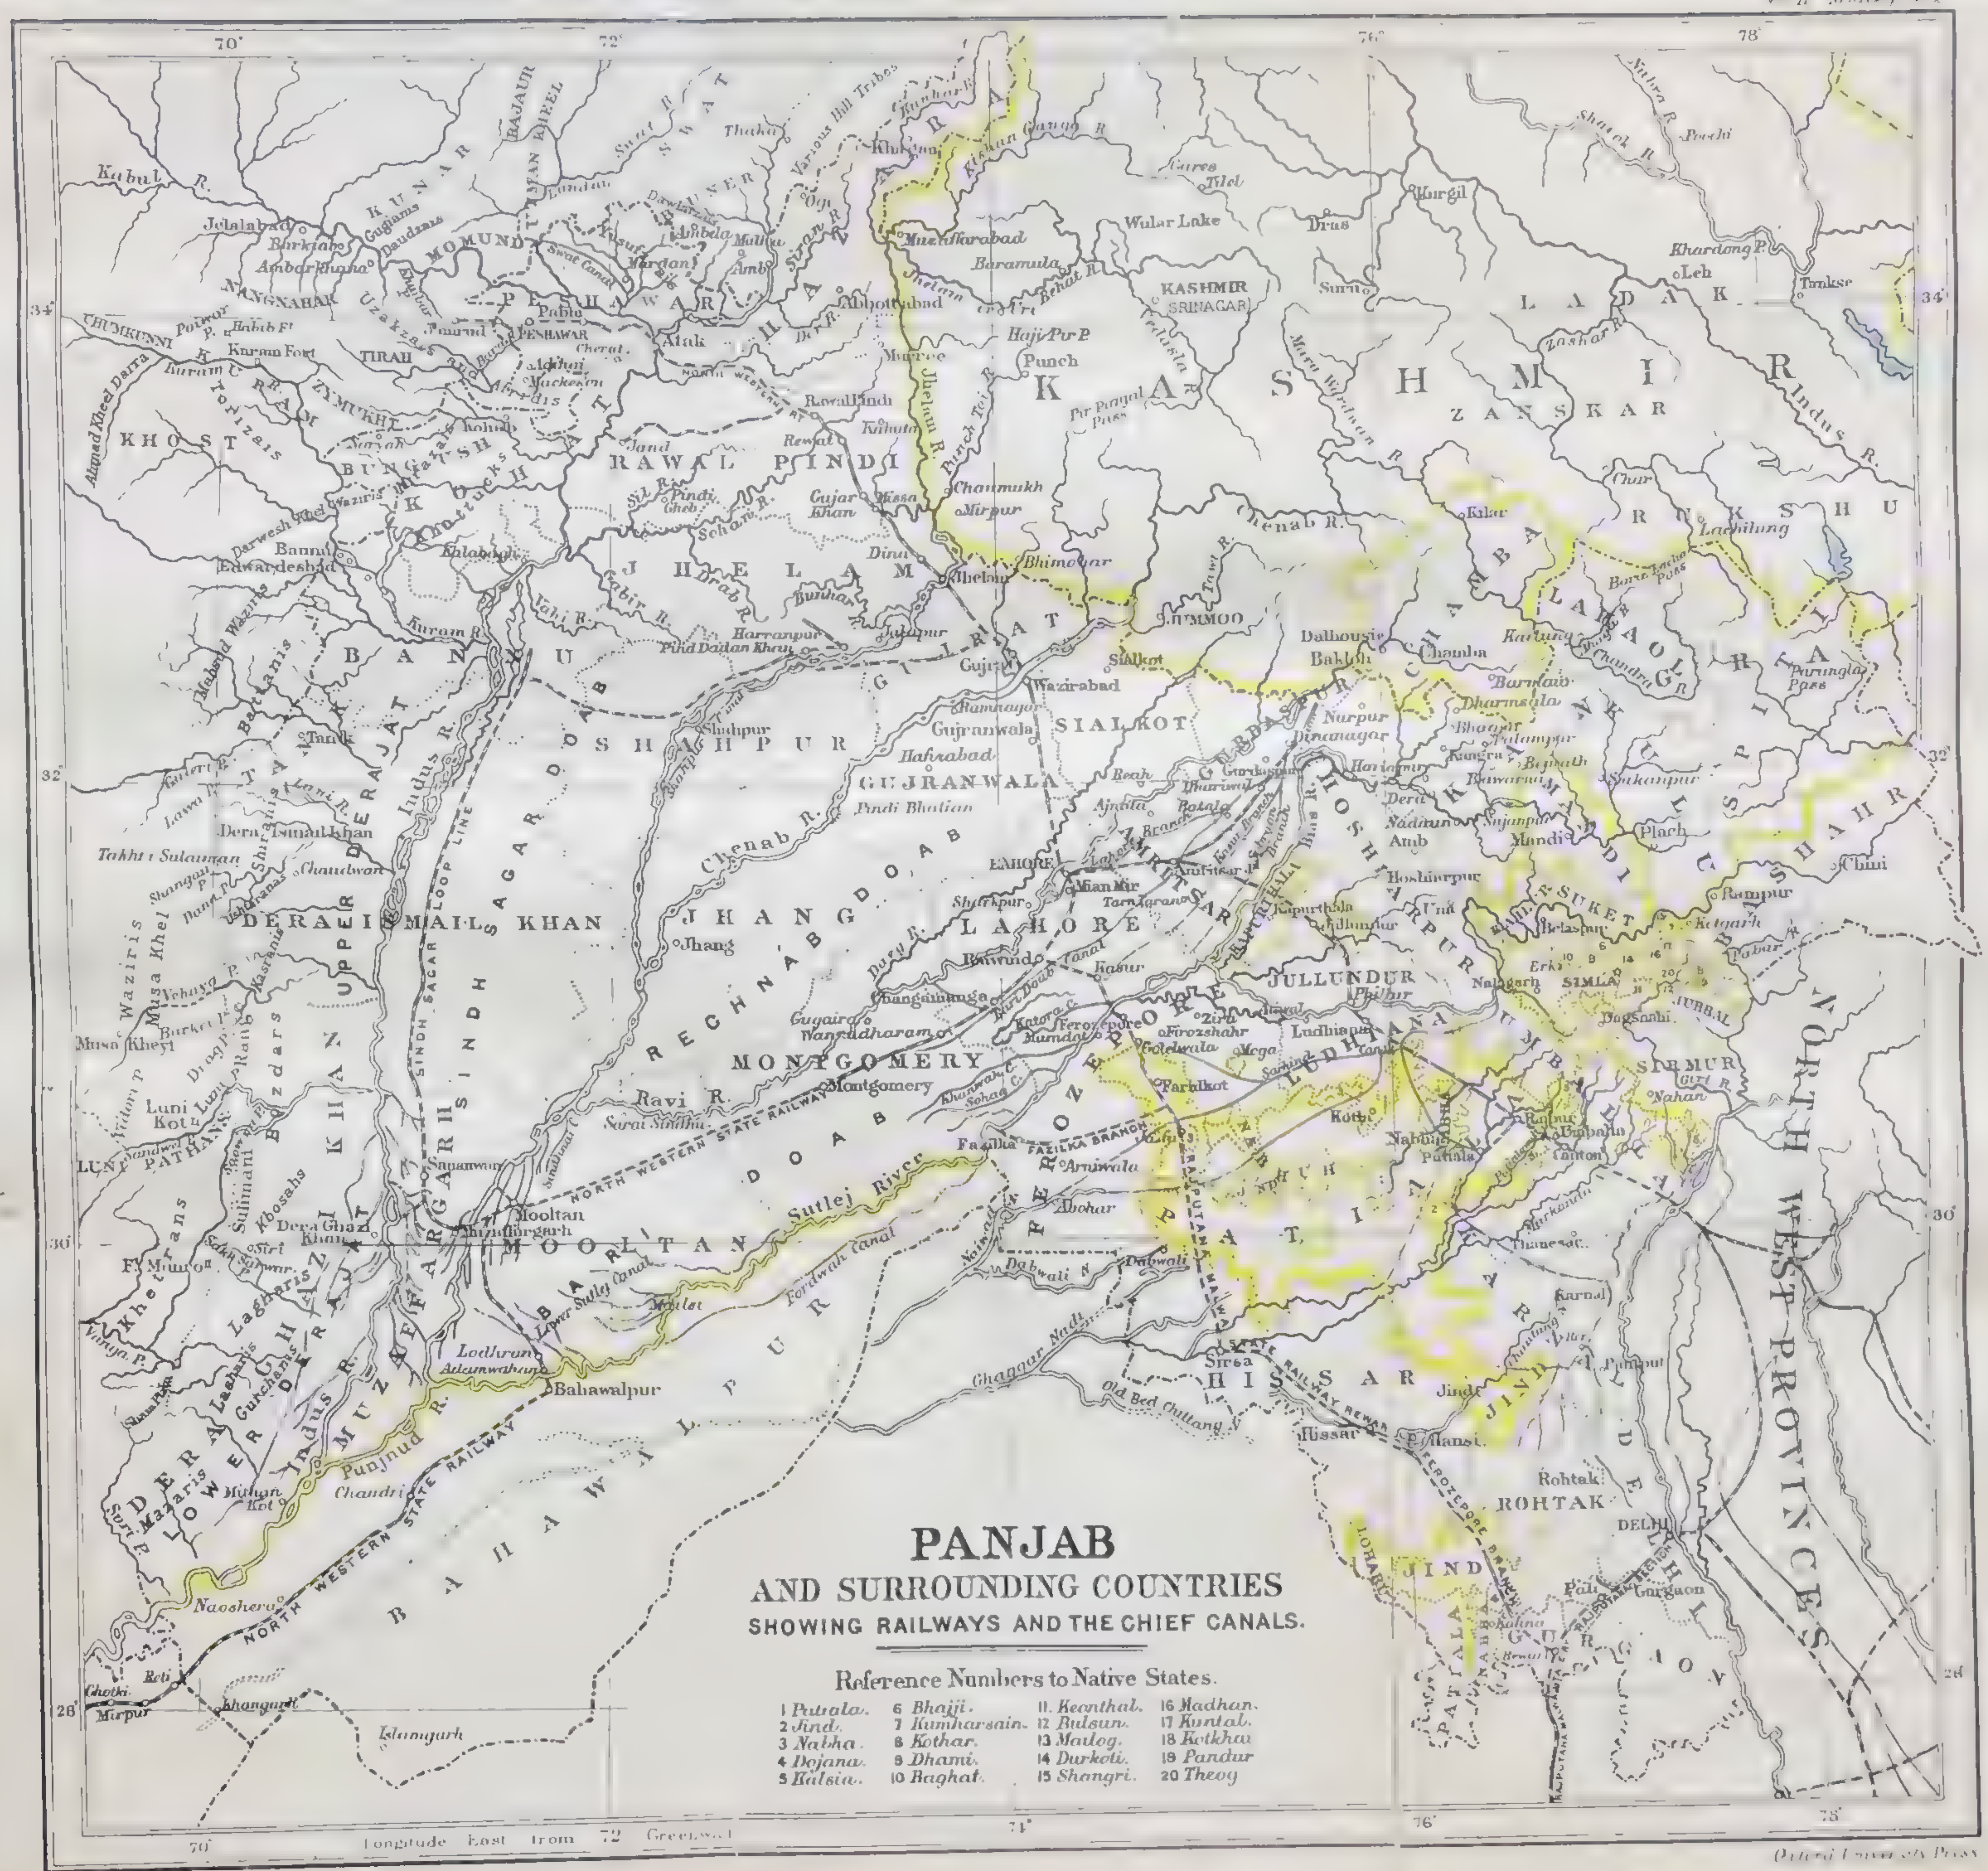

NORTHERN INDIA

# Patriarchatus Hierosolymitanus

*Cujus descriptionem tentabat  
D'ANVILLE Geographus Regius,  
Anno Erae Chr<sup>ae</sup> MDCCXXXII mensis Mayo*

- I PALÆSTINA PRIMA
- II SECUNDA
- III TERTIA

**MONITUM**

Cum huc Geographica descriptio, diligenti studio et summa cura sit elaborata, eoque studium illud et omnis cura, deveniret, ut Tabula existeret ab us, quae hactenus prodierunt, plurimum discreparet: etiam quodammodo magnitudinem, opere pretium fore visum est, diverfas Distantias, quae sunt universo operi quasi substructa basis et fundamentum, intra ipsam Tabulam, expressere.

Sola tamen notare decrevimus, Maritima quae Petros assignaverit, quamquam nulla, adhibuerimus à Recentioribus congnata, nec minus prope accurata, quam quae à Veteribus tradita sunt.

Ac licet in regione fere ubique montuosa et aspera, cujusmodi ea est, ut describeretur, Distantias illas lineis rectis tantum assumere, non expediret, non conveniret, lumen ne ab eis, qui idem argumentum tractaverit, libere exciperemus, ubique fere pro quinque et septuaginta Milliaribus, non pro a quin octoginta intra Gradus unius limitem coniecimus. Ac quando plura delinimus, pro certo haberi debet, nunquam id fecisse, nisi coacti manifesta rei difficultate, cum non omnium compleretur intervallorum, quae si singulorum explorata fuissent, haec res, circuli et anguli, peculiariter, quales alibi ex Distantiis paraculis, expressit, resisterent.

Ceterum, sine mutatione ad ullo discrimine, ad omnes quotquot coniecimus Distantias, Tabulam istam expressimus, quoniam Peritiorum veritatem ac fidem, curamque collatio et concordia, prout hic exhibetur, ratio deducit. Solum intervallum Neapolim inter et Bethleem delict, quod haud tantum exporrigendum fuit, quantum statutus in Tabula, Milliarum numerus, potestare videtur.

Itaque sub his Distantiarum seu intervallorum seriem et connectionem quandam, à Mari Rubro et Aegypti sinibus ad Syonem, et Neapolim, quae major etiam apparet, et Neapolim, ex Recentioribus patet, accessisse.

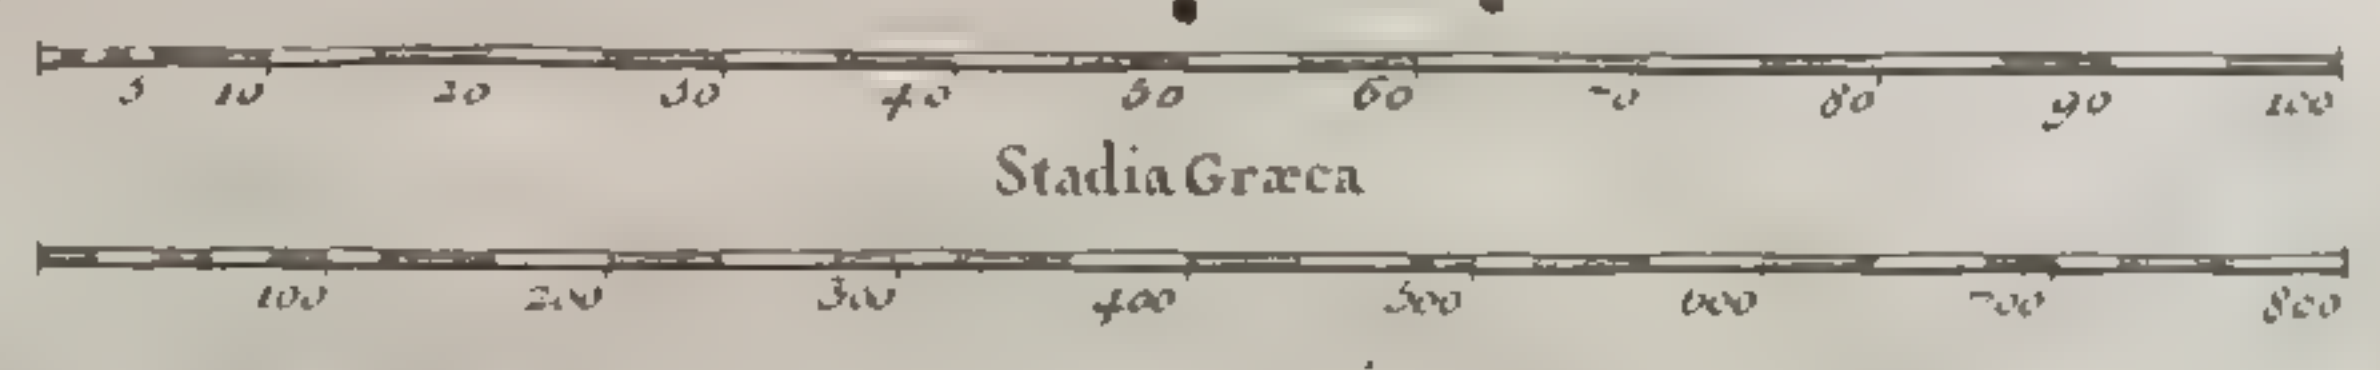

**SOLYM** sola est, cujus situs ex Latitudine seu recessu ab Equatore determinatur, si Equidem ubique, autem totius regionis, positionem in Longitudine, deinde, Maritima Aegypti et Kairi Longitudine, utriusque Astronomica observationibus explorata.

Inde autem quidquid Pelusium usque patet à Canum, quod in Tabula margine adscriptum, id totum ex diveris Distantiis, à Veteribus accurate sumis ratio perspicuum, et veritatem esse censuimus.

ROUTE  
 of  
 HIS MAJESTY'S MISSION,  
 under Sir Harford Jones, Bart.  
 Through PERSIA, in 1809.  
 By James Sutherland.  
 Captain on the Bombay Establishment.

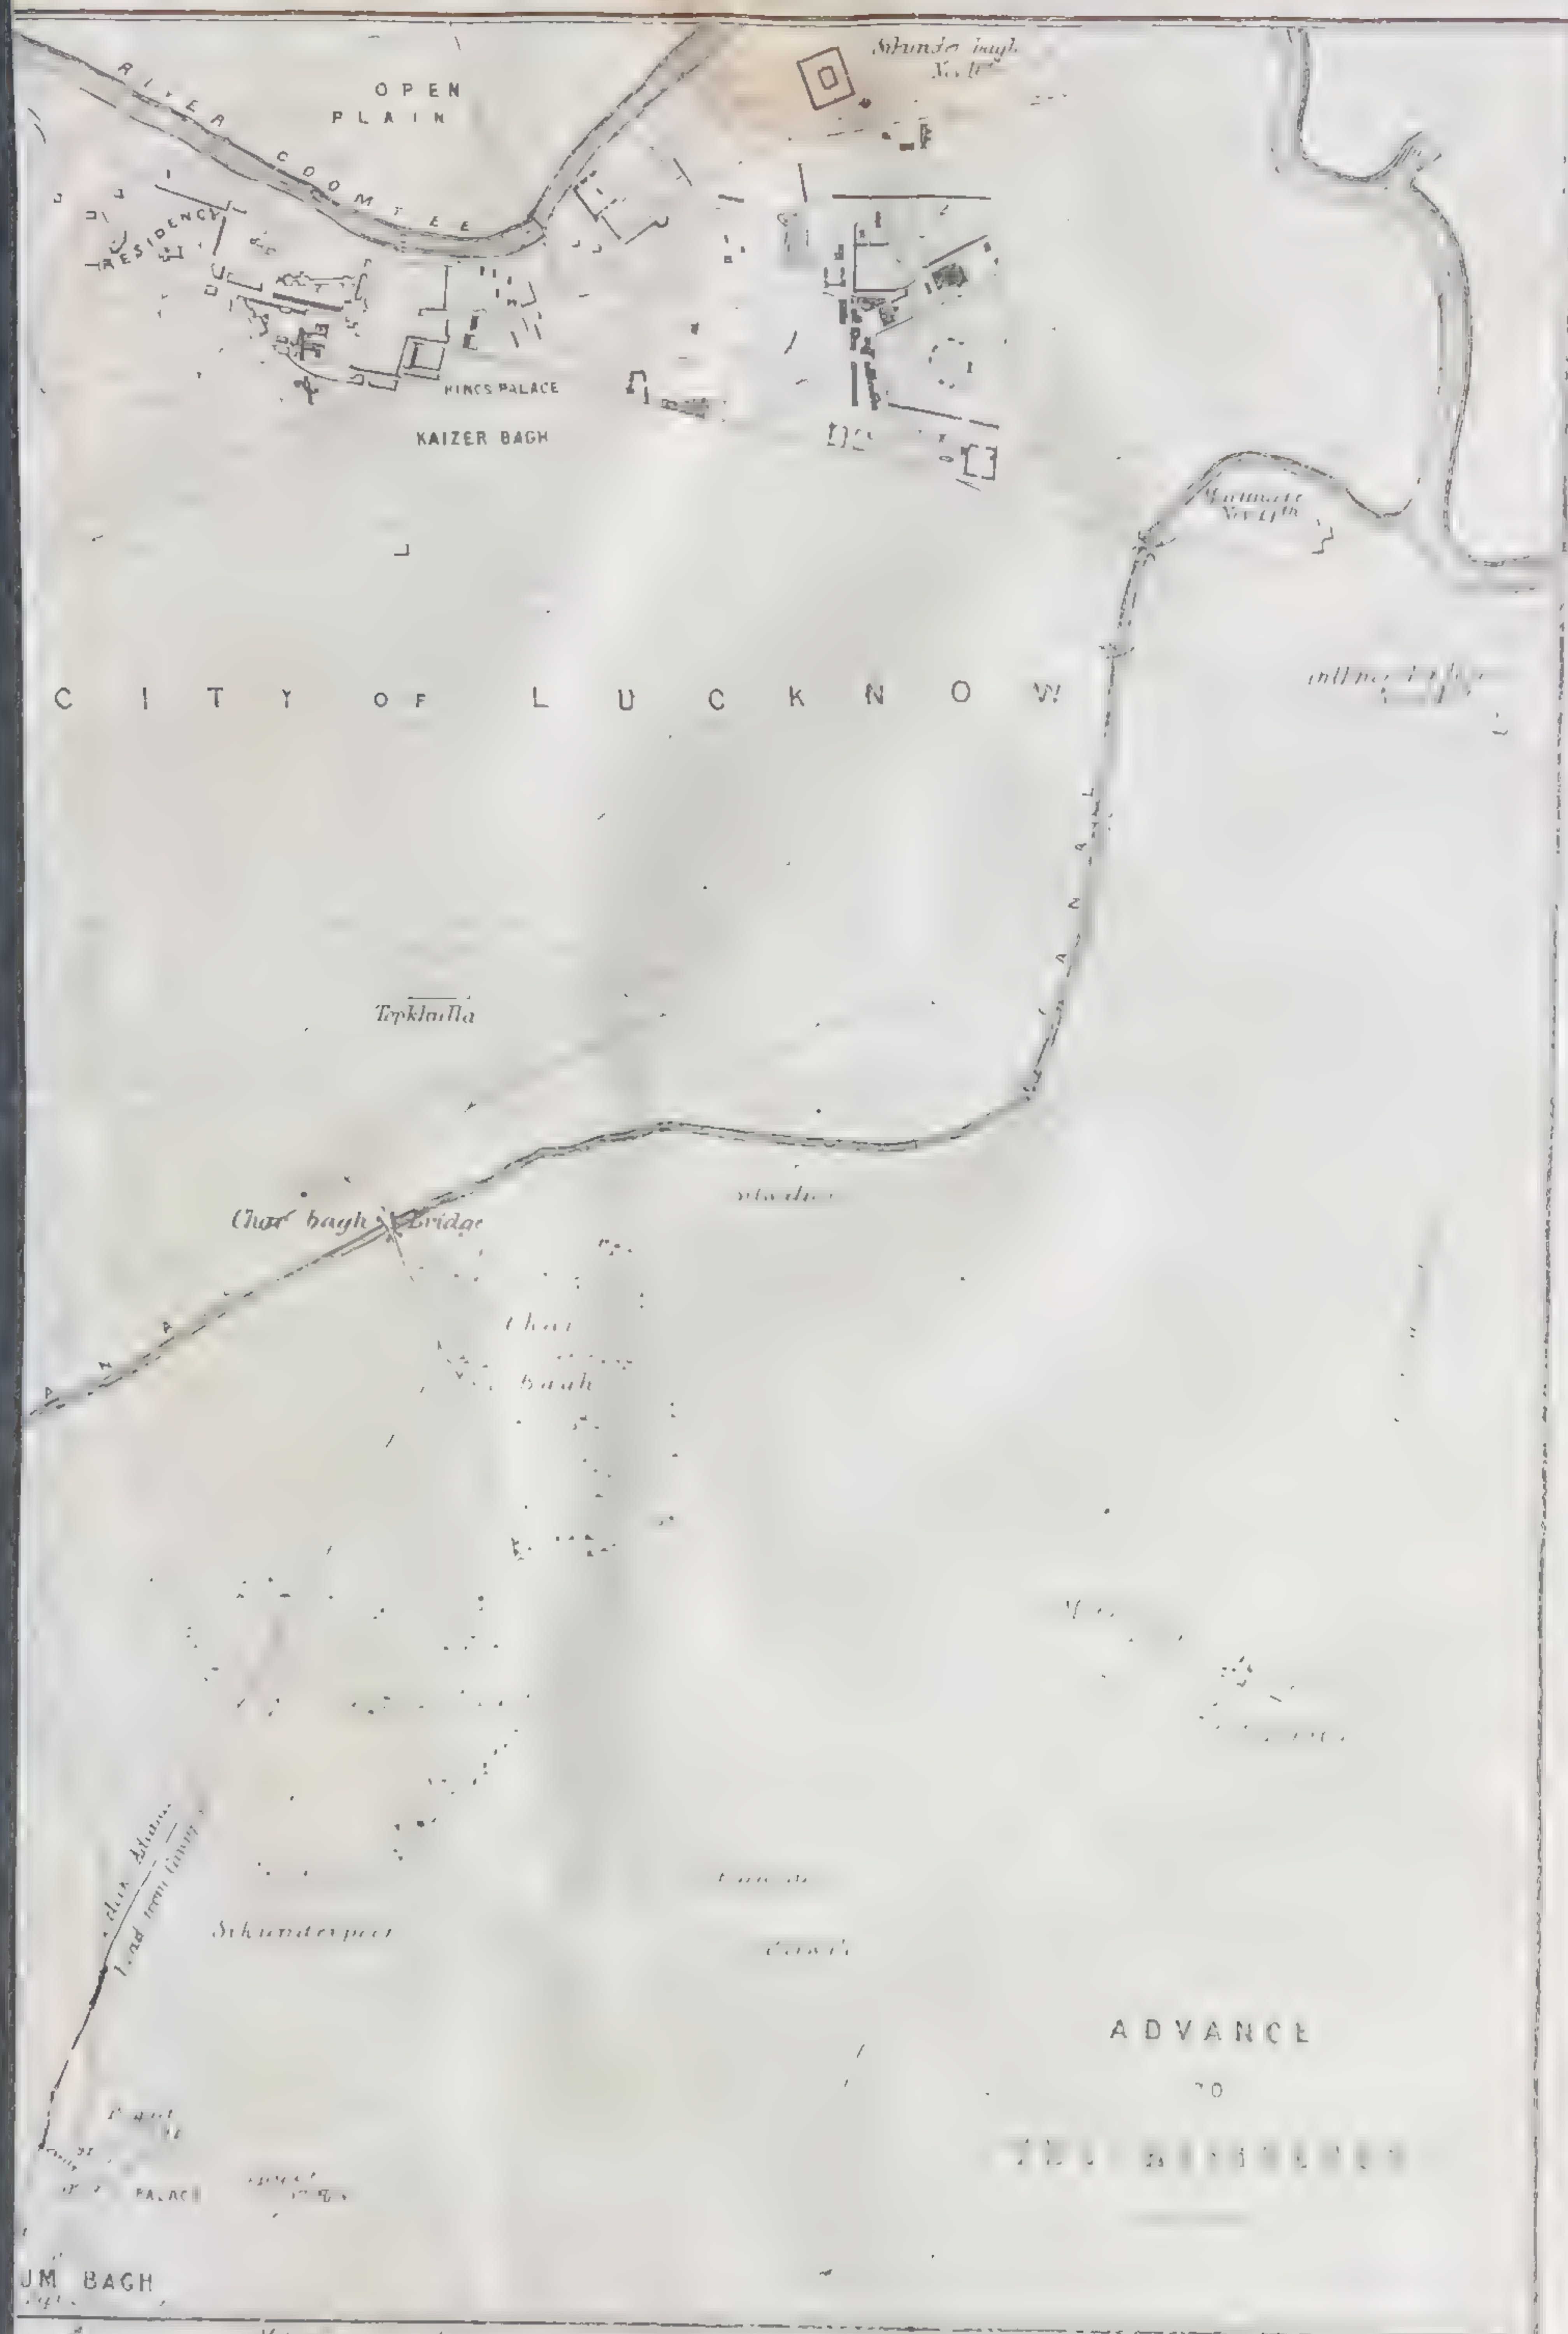

*Baden Powell's Land Revenue Systems of British India*

**SKETCH OF THE COUNTRIES**  
*Situated between SINDH and CONSTANTINOPLE*  
*Showing the ROUTE of HIS MAJESTY'S MISSION under*  
*Mr Harford Jones Bar<sup>t</sup> in 1800, from Bushire to Teheran*  
*and of Mr Morier from thence to Constantinople*  
*As also the Route of Col Malcolm in 1801*  
*By J Rennell*

**EXPLANATION**

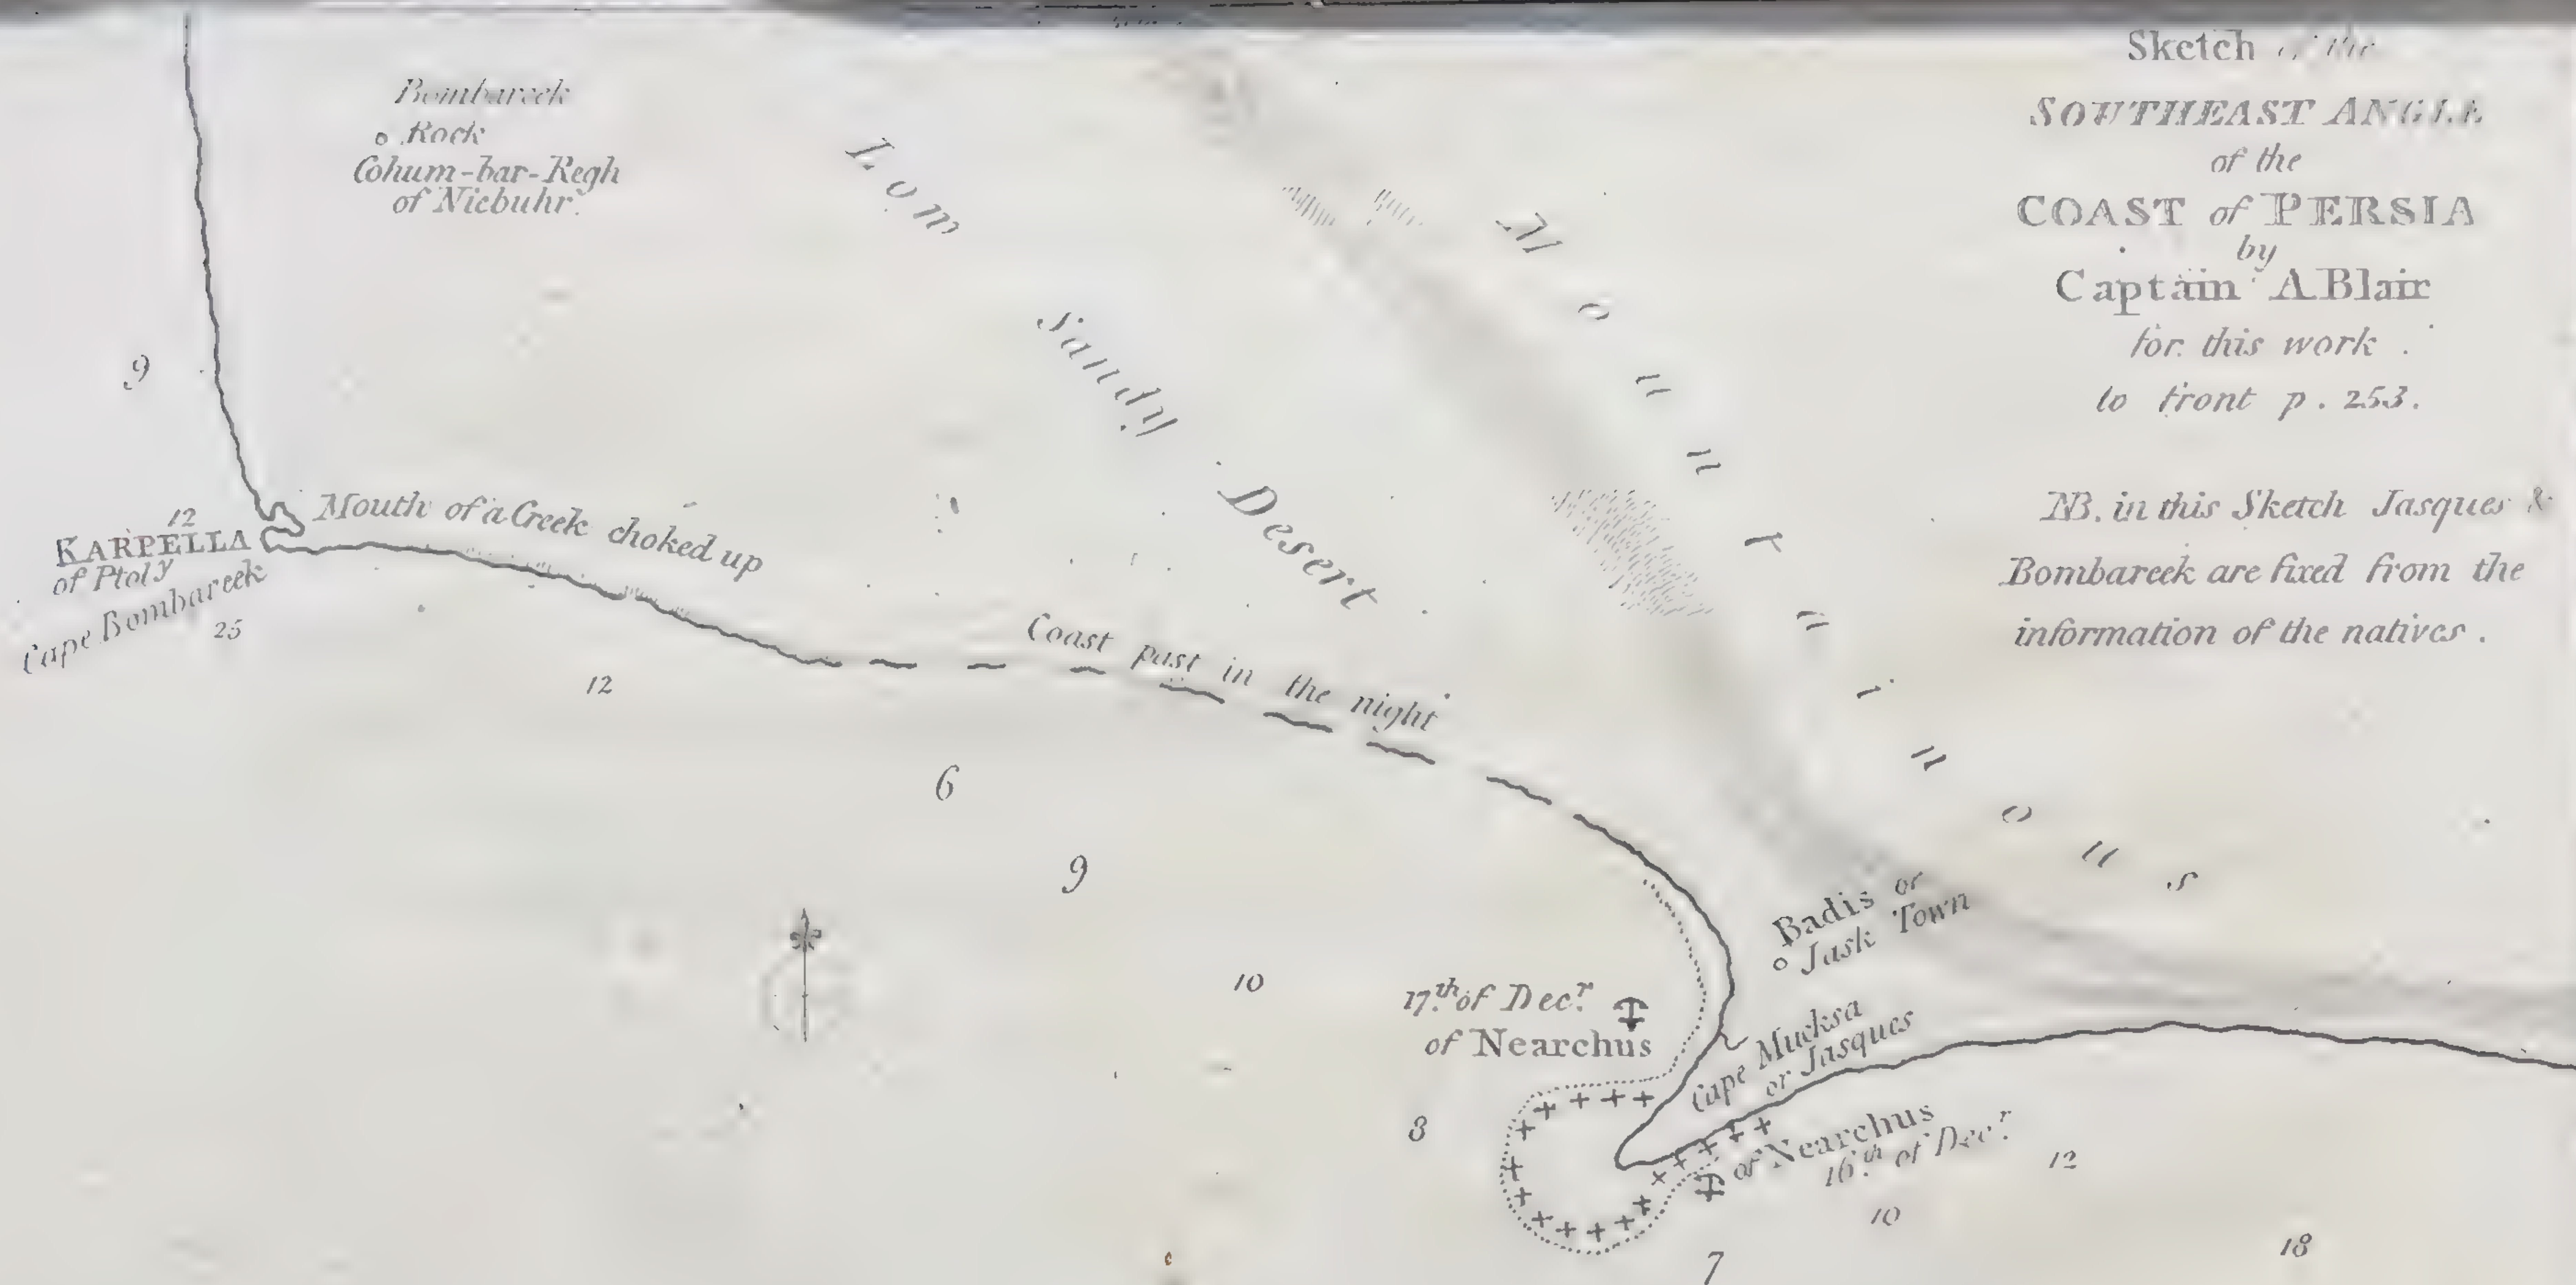

Route of H. M. Mission when over	Mr Morier's route
On some Ground with Col Malcolm	Col Malcolm's route
Mr Morier's route from Bushire	Mr Morier's route from Bushire

Geographic Miles

Sketch of the  
**SOUTHEAST ANGLE**  
 of the  
**COAST of PERSIA**  
 by  
 Captain A. Blair  
 for this work  
 to front p. 253.

*NB. in this Sketch Jasques &  
 Bombareek are fixed from the  
 information of the natives.*

*The ancient names by W.W.*

*Published according to Act of Parliament: Jan'y. 1<sup>st</sup>. 1797 by D. Vincent.*

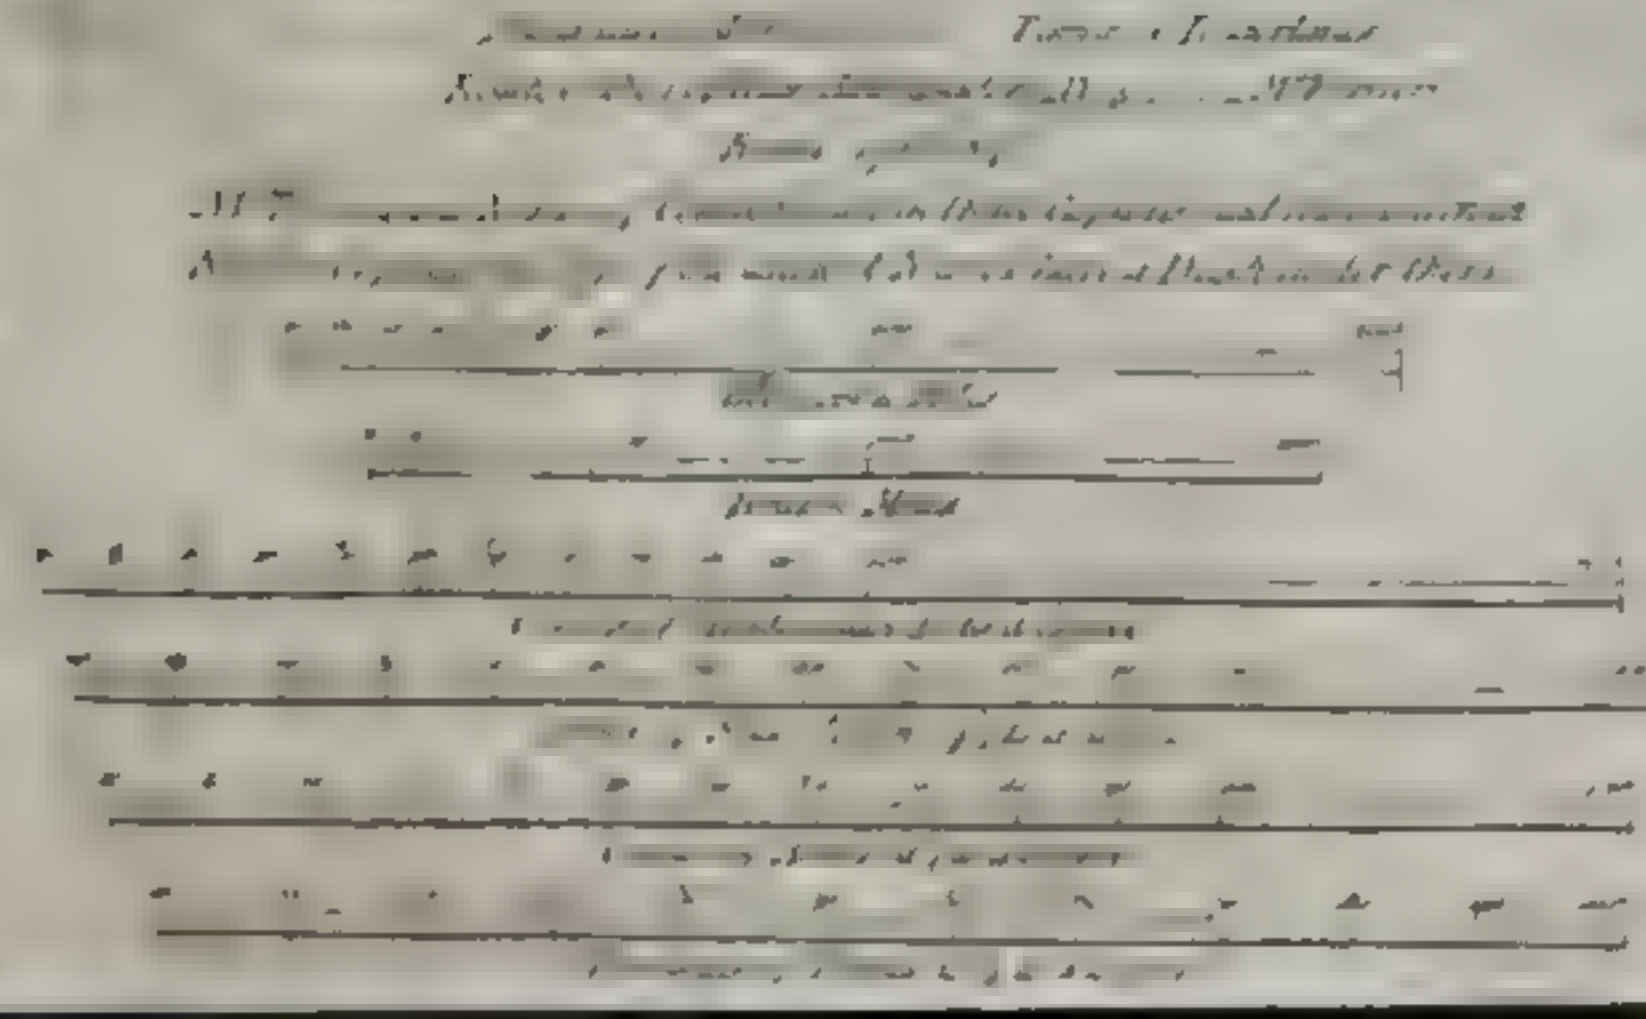

COUNTRIES

Legend for the map, listing various geographical features and their corresponding symbols or colors used on the map. The text is in a historical script, likely English, and includes descriptions of different types of terrain and boundaries.

The  
COUNTRIES,  
Situat'd between the Source of the  
GANGES and the CASPIAN SEA:  
1792.

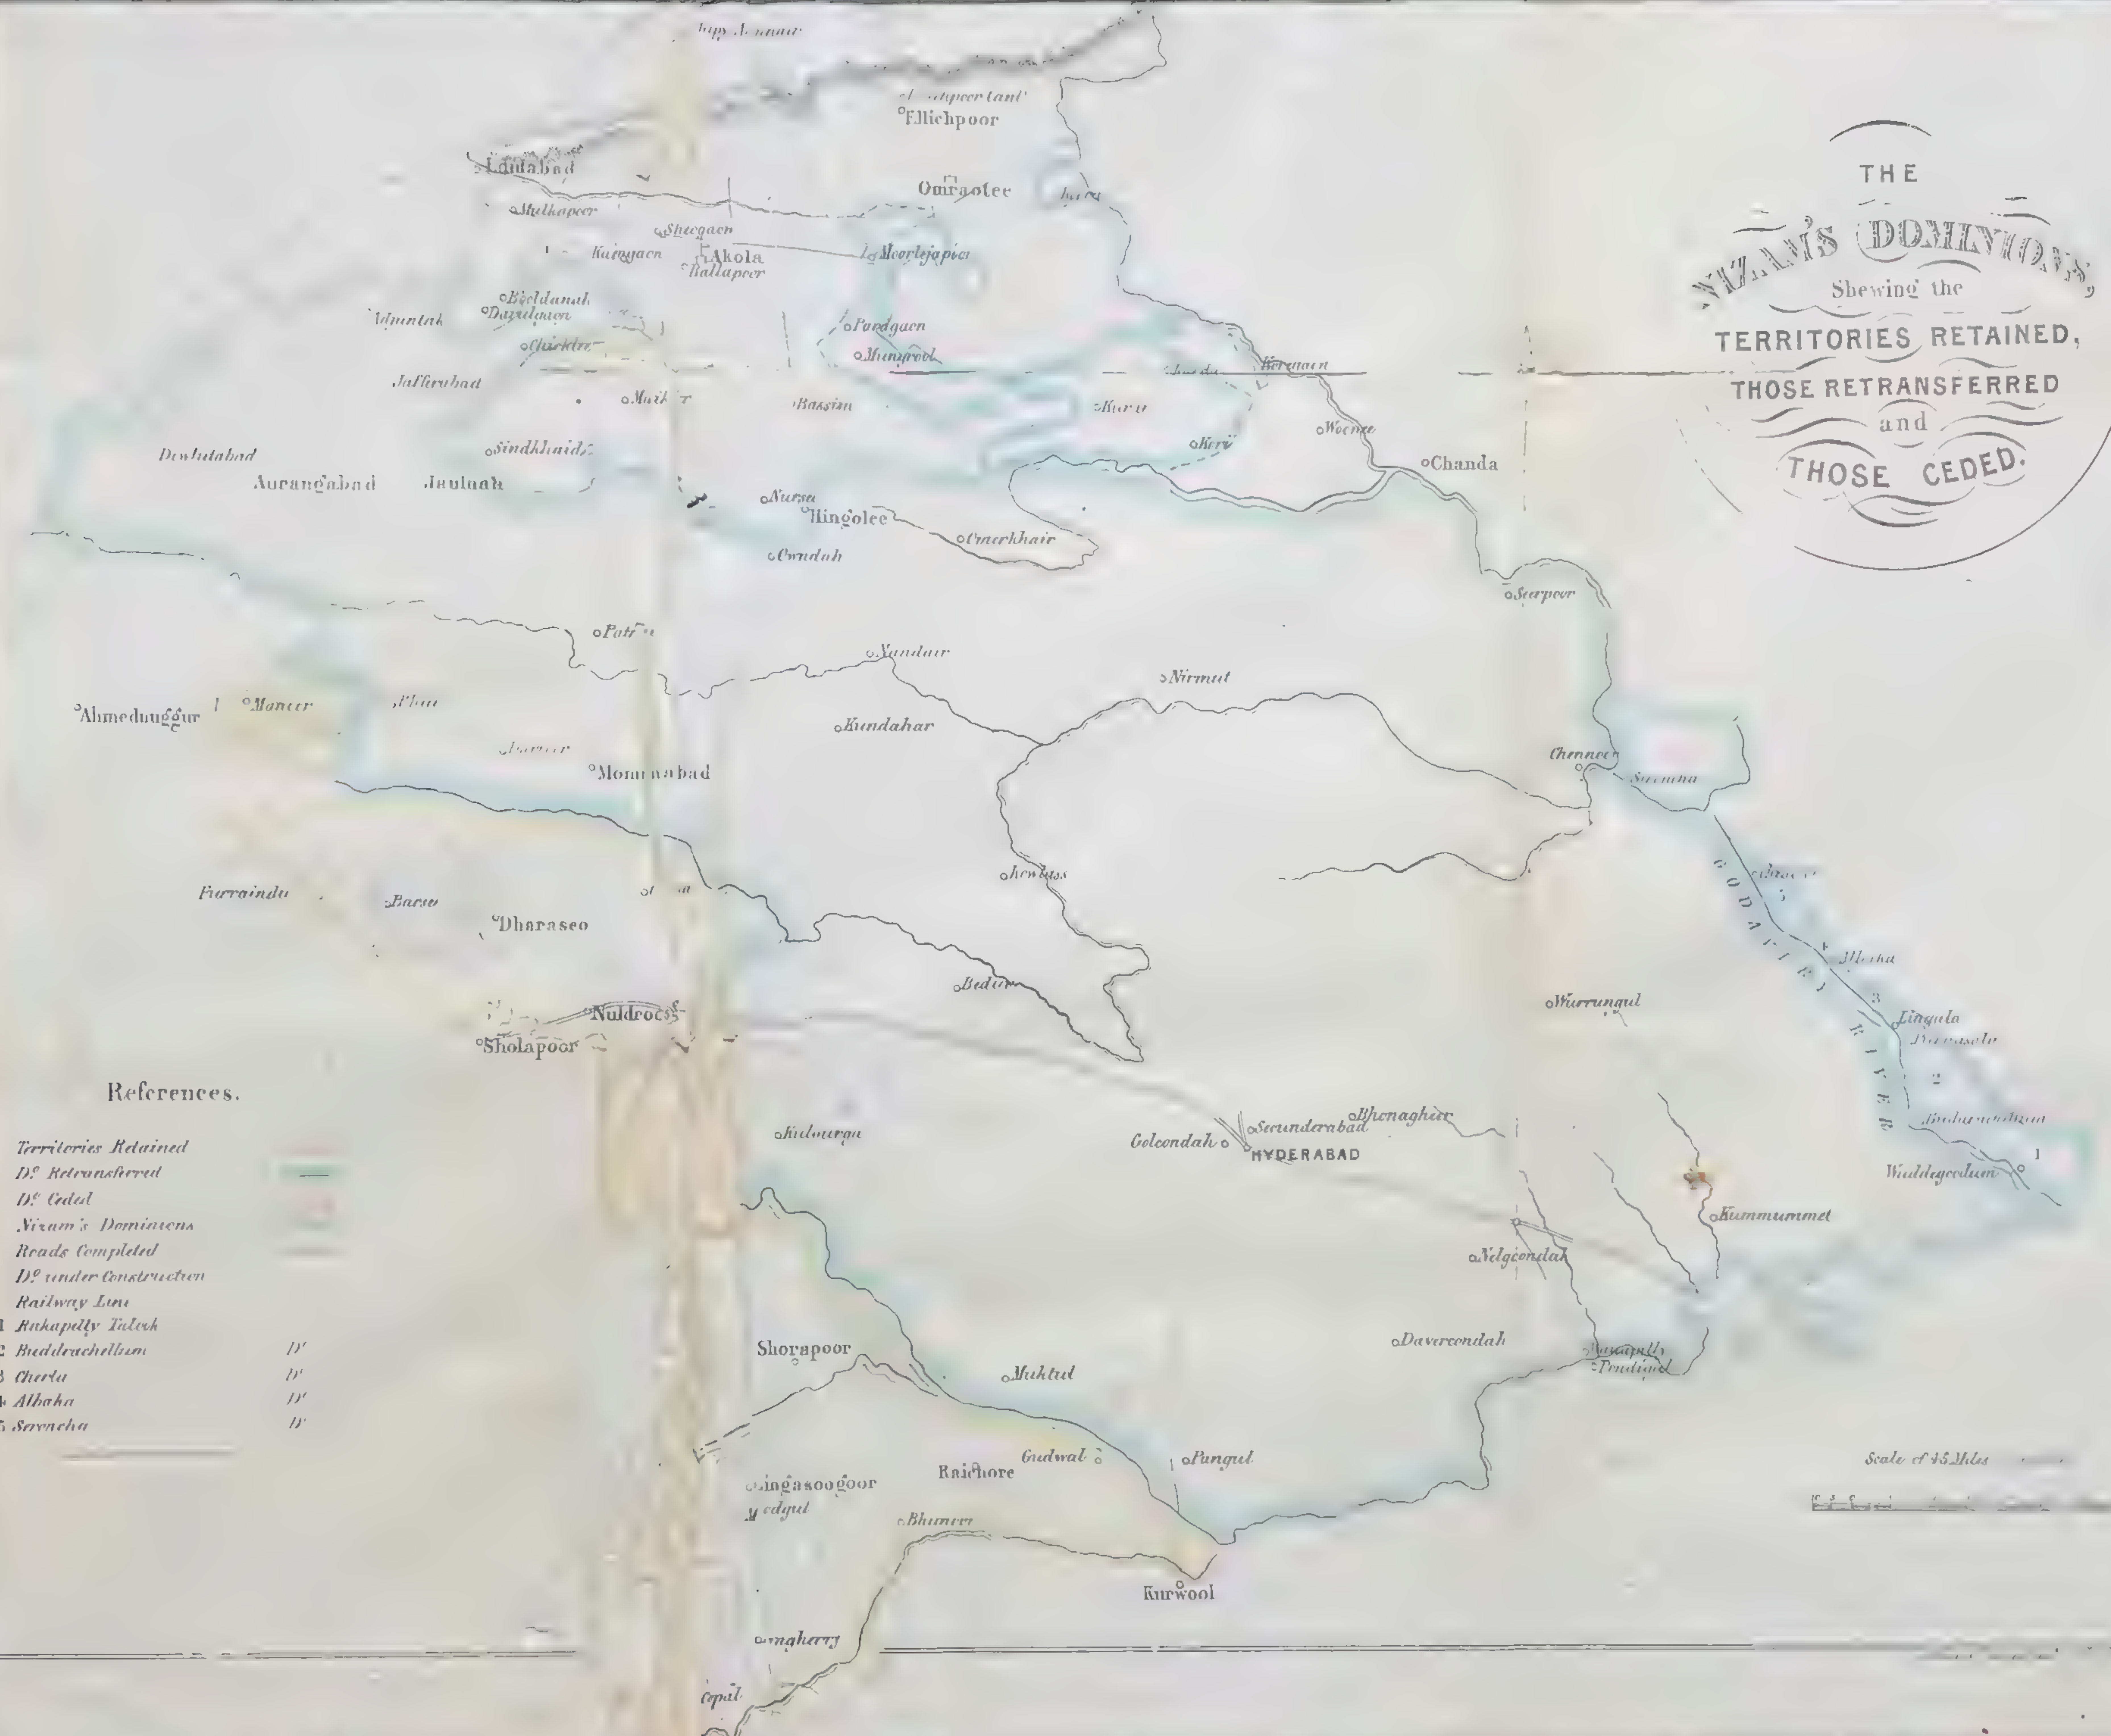

THE MAHRATTA COUNTRY, AND ADJACENT TERRITORIES.

Drawn by J. W. Colver
